

The background of the entire image is a deep space scene. It features a dense field of stars of various magnitudes, some appearing as bright points of light with diffraction spikes. In the center, there is a prominent nebula with swirling clouds of gas in shades of magenta, pink, and purple. To the left of the central nebula, there is a smaller, more diffuse blue and white nebula. The overall composition is centered and balanced, with the text elements overlaid on this celestial backdrop.

Time to capture the Celestial Prestige
